Ideation Phase — Brainstorm & Idea Prioritization Template

Date	14 October 2026	Maximum Marks
Project Name	Metro Ticket Generating System in ServiceNow	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming was used to generate and compare practical ideas for digitizing metro ticket booking. The selected concept focuses on a guided ServiceNow catalog experience, automated fare calculation and QR-based digital tickets.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

10 minutes to prepare

1 hour to collaborate

Paper ticketing
Queues, paper waste, manual effort

Static fare display
Fare errors when route changes

Mobile/QR ticket
Fast digital access

ServiceNow catalog
Structured, automated workflow

UPI / card payment
Cashless commuter experience

Analytics
Use transaction data for planning

Ideation Phase — Brainstorm & Idea Prioritization Template

Date	**14 October 2026**	**Maximum Marks**
Project Name	**Metro Ticket Generating System in ServiceNow**	**4 Marks**

Step-2: Generate, Group and Prioritize Ideas

Idea	User value	Feasibility	Automation	Priority
Digital ServiceNow ticket	High	High	High	1
QR ticket generation	High	High	High	1
Automated fare calculation	High	High	High	1
Cashless payment options	High	Medium	Medium	2
Analytics dashboard	Medium	Medium	Medium	3
WhatsApp booking	Medium	Low	Medium	4

Selected Concept

A ServiceNow Service Catalog solution where commuters select source and destination stations, choose single or return journey, enter passenger count, review an automatically calculated fare and receive a QR-based digital ticket at checkout.

Ideation Phase — Brainstorm & Idea Prioritization Template

Project Name	Metro Ticket Generating System in ServiceNow	4 Marks

Step-3: Idea Prioritization Matrix

Criteria	ServiceNow Catalog	Mobile App	Paper Ticket	WhatsApp
User convenience	5	5	2	4
Automation	5	4	1	3
Implementation fit	5	3	5	2
Digital ticket	5	5	1	5
Total	20	17	9	14

Decision

The ServiceNow catalog approach was selected because it directly matches the project platform, supports structured variables and client-side logic, and can be demonstrated end-to-end in a PDI. QR generation provides a clear digital output for the commuter.

Final Idea

Metro Ticket Generating System in ServiceNow

A lightweight digital metro ticketing solution implemented using ServiceNow Service Catalog. The catalog item captures source, destination, journey type and passenger count; JavaScript calculates route fare; payment options support checkout; and a QR code is generated as the digital ticket output.

Expected Benefits

- Reduced dependence on physical tickets and manual fare calculation.
- Consistent station and journey data capture.
- Faster commuter checkout and digital ticket access.
- Reusable ServiceNow design for future metro services.
- Foundation for analytics, validation and future payment integration.
