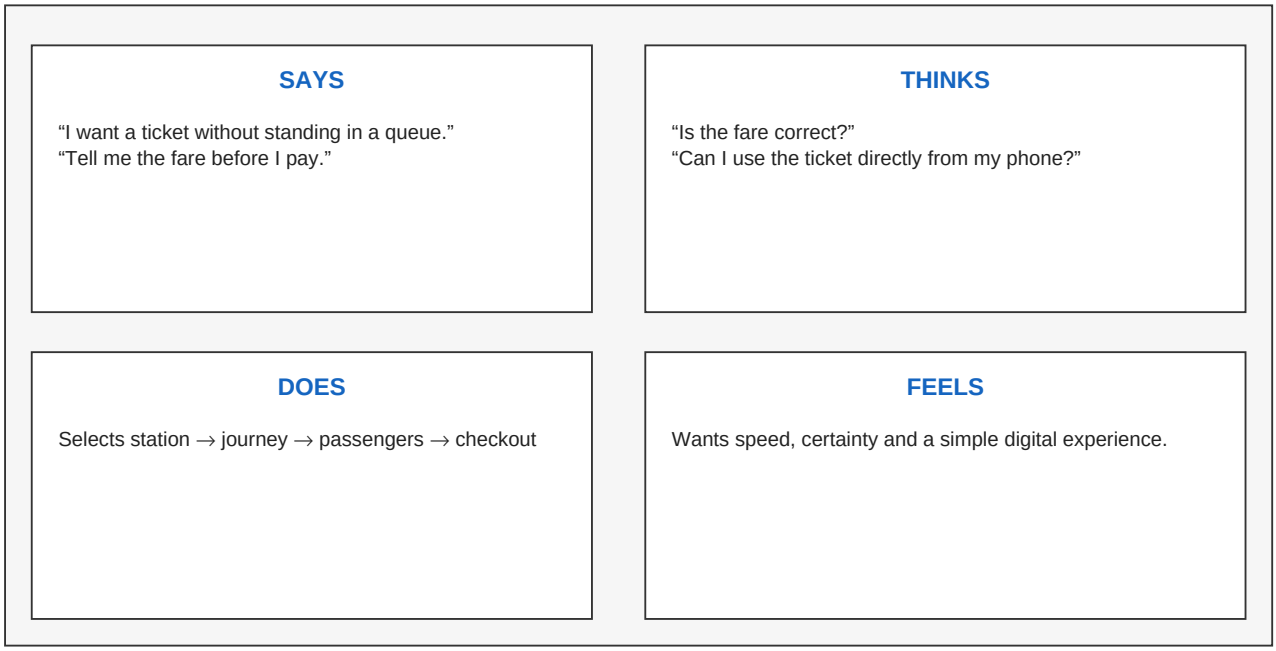
Ideation Phase — Empathize & Discover

Date	14 October 2026	Maximum Marks
Project Name	Metro Ticket Generating System in ServiceNow	4 Marks

Empathy Map Canvas:

The empathy map captures the commuter's behaviour, needs, frustrations and expectations while using a metro ticketing service.



PAINS ↔ GAINS

Pains: queue time, manual fare uncertainty, physical ticket dependency.
Gains: quick checkout, correct fare, QR-based digital ticket, reusable digital record.

Ideation Phase — Empathize & Discover

Date	14 October 2026	Maximum Marks
Project Name	Metro Ticket Generating System in ServiceNow	4 Marks

Empathy Map — Insights

Dimension	Observation	Design implication
Says	Wants a fast ticketing experience	Keep catalog form simple and guided
Thinks	Needs confidence in fare and route	Show fare after route/journey selection
Does	Uses mobile/portal for self-service	Provide Service Portal catalog item
Feels	Frustrated by waiting	Automate calculation and digital output
Needs	A ticket that can be shown digitally	Generate QR ticket
Expects	Accurate passenger-based total	Scale fare using passenger count

Key Insight

The strongest opportunity is not merely replacing paper with a screen; it is reducing the number of decisions and manual calculations the commuter must perform.
