Acceptance Criteria & Sign-off

Requirement	Acceptance Criteria	Evidence / Result	Status
Booking form	All required booking inputs are available.	PDI catalog item demonstrated.	PASS
Fare logic	Configured routes return expected single/return fares.	Fare values validated.	PASS
Passenger scaling	Fare changes with passenger count.	Validated in catalog.	PASS
QR output	A QR image is displayed after checkout.	QR modal demonstrated.	PASS
Data model	Stations are stored in custom station table.	Station records verified.	PASS

UAT Conclusion

The MVP meets the defined acceptance criteria for the implemented scope. The remaining production-grade work is integration-focused, particularly payment gateway compliance, dynamic fare administration and QR validation at entry points.
