User Stories

ID	User Story	Acceptance Criteria
MT-01	As a commuter, I can select starting and destination stations.	Both station variables reference Metro Station's Details.
MT-02	As a commuter, I can choose Single or Return journey.	Only the two configured journey choices are available.
MT-03	As a commuter, I can enter passenger count.	Passenger count is captured and used for fare scaling.
MT-04	As a commuter, I can see the calculated fare.	Configured route fare updates based on journey type and passengers.
MT-05	As a commuter, I can select payment mode.	Payment choices are presented before checkout.
MT-06	As a commuter, I receive a QR ticket.	QR modal is shown with a generated ticket URL.
MT-07	As an admin, I can maintain station records.	Station records are stored in the custom station table.
MT-08	As a project owner, I can analyze transactions.	Request/ticket data can support future reporting and analytics.

Data Validation and Processing

1. Validate source and destination

2. Read journey type

3. Read passenger count

4. Match route to fare

5. Calculate total

6. Generate QR output
